

Use this chart to ensure that your Outboard Motor will provide enough power to push your boat with the addition of an Outboard Jet. This chart applies to about 95% of Outboard Jet Owners but there are anomalies so be aware that this may not apply to you. Use this in conjunction with the Weight/HP Chart. Size is measured by feet of length by inches of bottom width. Example: 1448 is 14 feet long and 48 inches wide. Not all hull sizes are represented here, just the most popular. If you cannot find your hull size, give us a call at 510-562-6049.

Hull Size	Two Stroke HP	Four Stroke HP
1448	25-30	25*
1548	30-40*	40*
1648	40-60*	60*
1652	50-60	60*
1660	50-70	60
1752	60-90*	90*
1760	75-90	90*
1860	90-115	115*
1872	115-130	115
2072	150-200	150-200*

* Float pods are recommended
